

JOB DESCRIPTION: SENIOR LAND DEVELOPMENT ENGINEER

JOB DESCRIPTION

- Opportunity to get involved in a variety of land development projects.
- Great team environment.
- Dynamic, fast-growing company with enviable projects.

We are looking for a Senior Land Development Engineer to assist in designing residential and commercial subdivisions around the greater Auckland area. If this sounds like you, contact us!

ABOUT THE ROLE

Reporting to the Director of Land Development, you will be contributing towards high quality project design deliverables. The primary objective of the Senior Land Development Engineer is to lead and assist the Land Development team in the successful delivery of our high-profile projects whilst also providing technical advice to clients. This role is based in our Stellar Project's Takapuna office.

KEY OUTPUTS

- Provide engineering services to clients, using practical engineering solutions in a timely fashion. This often includes following the project from identification of issues to the construction of physical works remedies.
- Undertake civil design, investigations, reports, and drawings to professional and relevant standards.
- Provide leadership and technical support to other aspects of the engineering team as workload dictates, including project management, contract documentation and site supervision, and client liaison.
- Lead design of land development projects and perform technical reviews and sign off engineering documentation. Provide training and mentorship for our junior staff in the team.
- Project support for deliverables such as proposal preparation, job tasks, work planning and financial management requirements.

- Lead the team to provide practical designs to complement our reputation for providing agile and forward-thinking solutions.
- Assisting with any other tasks within the Employer's consultancy, as appropriate; and
- A strong team player with the ability to work with diverse teams and skills who will truly be an asset to the Stellar Projects brand.

WORK EXPERIENCE

- Minimum 8-10 years' experience in the engineering industry.
- Extensive experience in design with AutoCAD Civil 3D for civil design and land development projects.
- Local experience in the design and construction of earthworks, storm water, wastewater, water supply and roadway infrastructure projects in both infill and greenfield settings.
- Experience in stormwater design including flood and overland flow path assessments, water sensitive urban design would be an advantage.
- Understanding of relevant design standards including Unitary Plan, Stormwater Code of Practice (Auckland Council), Water and Wastewater Code of Practice (Watercare), Auckland Transport Code of Practice and New Zealand Building Code.
- Fully understand construction contracts specifically NZS3910.

EDUCATION

- Bachelor's degree or higher in a relevant discipline (Civil Engineering or similar).
- Recognised qualifications such as Chartered Engineer or ability to obtain certification with 12 months would be an advantage.

KEY SKILLS

- Thorough understanding of technical design requirements for NZ regional projects.
- Ability to quickly and effectively establish a working relationship with our Land Development team.

- Ability to design key civil infrastructure, from evaluation and concept through to construction documentation.
- Strong attention to detail, able to focus on critical elements, while remaining mindful of the bigger picture.
- Strong written and verbal communication skills.
- A highly motivated and autonomous individual who shows initiative and who values being part of a talented team with diverse skills and experience.
- A strong team player who will truly be an asset to the Stellar Projects brand.

WHY STELLAR PROJECTS?

Our company boasts a strong and dedicated team, delivering a wide variety of projects to an enviable range of clients. We understand the importance of providing a great experience for our stakeholders - both internal and external.

We have grown to over 60 staff in a short space of time (the company was founded in 2013). Our success is largely due to the high calibre of personnel we attract and retain, with specialists in a wide range of services: advisory, planning and consents, project management, design, construction, quantity surveying and asset management.

We continue to expand and deepen our service offering to clients and are committed to providing a great working environment for staff. If being part of a dynamic and innovative team, with opportunities to showcase your ability, motivates you, then we believe we can offer you great career progression. An attractive benefits package is offered.
